PRESS RELEASE

Former FPL Power Generation President C.O. Woody Joins Modus Operandi Board

MELBOURNE, Florida, March 4, 2002 –Modus Operandi, Inc. announced today the appointment of Mr. C. O. Woody, former President of Florida Power & Light's Power Generation Division, to its Board of Directors.

Mr. Woody began his career in 1956 in FPL's Miami Beach Plant. During his more than four decades with FPL, C.O. participated in a technological explosion which included the commercialization of nuclear energy which he became deeply involved in at the national level.

C.O.'s position when he retired in 1999 was President, where he was responsible for FPL's non-nuclear power generation facilities, which included more than 16,000 megawatts. He was involved at the corporate level in FPL's quality implementation, including FPL's winning the Deming Quality Award in 1989.

C.O. holds a Master's degree in Business Administration from the University of Miami and is a graduate of the Harvard Business Program for Management Development.

Said Modus Operandi Chairman Jack Hight, "I am very happy that C.O. has agreed to serve on our Board. C.O. has a deep love for the utilities industry and desire to help the industry successfully face the challenges ahead. His background as a business leader and his role in shaping the utilities industry will be invaluable in our efforts to serve that industry."

About Modus Operandi

Modus Operandi is an enterprise collaboration solutions company. The company's solutions link people, processes, and systems – so that the client's entire enterprise operates as a single, well-oiled machine. The company's highly experienced teams and proven methods enable it to provide rapid, high quality, high ROI solutions. Modus Operandi is an IBM Certified for e-business - Business Partner and was named as 2001 Solution Partner of the Year by Borland Software Corporation.

The company's solutions address both the processes involved in effective collaboration as well as the key enabling technologies necessary for sharing of critical information. These solutions have consistently helped our clients address such challenges as accelerating the speed

of business, improving profitability and reducing costs, dealing with the impact of technology, and increasing revenue by building stronger customer relationships, retaining good customers, and increasing share-of-customer.

The company's solutions are specifically targeted to processes and interactions that are highly information intensive. Such processes often rely on rich underlying collections of data, often maintained in disparate information systems. Some of the key business processes that can benefit from their solutions include planning, logistics, management, and product or service design and development.

The company provides solutions to business and government customers, and offers focused solutions to the electric utilities market. Offerings to the utilities market include power generation management for portfolios of generating assets, load management for large consumers of power, and enterprise integration to reduce costs and streamline utilities' operations.

Additional information on Modus Operandi's business and technology solutions is available from Modus Operandi, Inc., 122 Fourth Avenue, Indialantic, FL 32903. Phone: (321) 984-3370. Fax: (321) 728-3957. E-mail: <mailto:info@modusoperandi.com>. Website: <http://www.modusoperandi.com/>. The company maintains offices in Atlanta; Dallas; Shrewsbury, NJ; West Palm Beach and Melbourne, Florida.
