PRESS RELEASE

Modus Operandi CEO Featured in Electric Light & Power Interview

MELBOURNE, Florida, April 19, 2002 – Modus Operandi, Inc., announced today that President & CEO Peter Dyson was recently interviewed by Electric Light & Power Magazine for their special feature "Optimization Offers Alluring Generation Strategies" to provide perspectives on gaining operational efficiency through asset management. The full article can be viewed at:

http://elp.pennnet.com/Articles/Article_Display.cfm?Section=Articles&SubSection=CurrentIssue&ARTICLE_ID=139986&VERSION_NUM=1

In the interview, Mr. Dyson shares his views about some of the market and cultural changes happening in the utilities industry, and the opportunities for utilities to take a portfolio approach to increasing the ROI on their generation assets.

Modus Operandi provides focused solutions to the electric utilities industry including:

- Business process transformation and enterprise integration solutions aimed at streamlining operations, reducing costs, and improving customer relationships
- Power Generation Management solutions for maximizing ROI on portfolios of generating assets, both through cost savings and from increased revenue opportunities
- Load Management solutions for managing demand in peak load situations.

About Modus Operandi

Modus Operandi is an enterprise collaboration solutions company. The company's solutions link people, processes, and systems – so that the client's entire enterprise operates as a single, well-oiled machine. The company's highly experienced teams and proven methods enable it to provide rapid, high quality, high ROI solutions. Modus Operandi is an IBM Certified for e-business - Business Partner and was named as 2001 Solution Partner of the Year by Borland Software Corporation.

The company's solutions address both the processes involved in effective collaboration as well as the key enabling technologies necessary for sharing of critical information. These solutions have consistently helped our clients address such challenges as accelerating the speed of business, improving profitability and reducing costs, dealing with the impact of technology,

and increasing revenue by building stronger customer relationships, retaining good customers, and increasing share-of-customer.

The company's solutions are specifically targeted to processes and interactions that are highly information intensive. Such processes often rely on rich underlying collections of data, often maintained in disparate information systems. Some of the key business processes that can benefit from their solutions include planning, logistics, management, and product or service design and development.

The company provides solutions to business and government customers, and offers focused solutions to the electric utilities market. Offerings to the utilities market include power generation management for portfolios of generating assets, load management for large consumers of power, and process transformation and enterprise integration to reduce costs and streamline utilities' operations.

Additional information on Modus Operandi's business and technology solutions is available from Modus Operandi, Inc., 122 Fourth Avenue, Indialantic, FL 32903. Phone: (321) 984-3370. Fax: (321) 728-3957. E-mail: info@modusoperandi.com. Website: <http://www.modusoperandi.com/>. The company maintains offices in Atlanta; Shrewsbury, NJ; West Palm Beach and Melbourne, Florida.
