NEWS RELEASE

Don Jenkins Named Vice President at Modus Operandi *Retired U.S. Army Colonel Will Help Lead Growth in the ISR Domain*

MELBOURNE, Florida, April 21, 2008 – Modus Operandi, a leading software and information integration technology company, announced the appointment of Don Jenkins as vice president of Intelligence, Surveillance and Reconnaissance (ISR) Programs. Mr. Jenkins, a retired U.S. Army Colonel, will lead corporate growth initiatives with strategic programs in the ISR market segment. He will also have executive responsibility for setting the business vision and product capability requirements for the development of Modus Operandi's Wave® ISR Suite, a software-based solution that targets data management and analysis needs of intelligence analysts.

Mr. Jenkins comes to Modus Operandi with extensive experience in the intelligence arena. He spent 25 years as an intelligence officer in the U.S. Army with responsibility for Intelligence, Security, and Aviation Systems. His assignments included Battalion Commander, Group Commander, and Director of Intelligence and Security, with responsibilities for nationally critical ISR platforms, including the Guardrail Common Sensor (GRCS), Airborne Reconnaissance Low (ARL), and the Joint Surveillance Target Attack Radar System (JSTARS). After retiring from the Army he helped lead two fast-growing companies -- Radiance and IRIS (now part of ArgonST). At those companies Mr. Jenkins worked closely with a number of U.S. government agencies, including the U.S. Special Operations Command (USSOCOM), the U.S. Border Patrol, the Department of Homeland Security, and the Intelligence and Security Command—US Army (INSCOM).

"Don's broad experience in the ISR domain and with a number of key government agencies and programs will provide a critical 'insider's viewpoint' for Modus Operandi," said Peter Dyson, president & CEO, Modus Operandi. "His time at the Army and familiarity with the primary players in the ISR sector will prove invaluable both for us and for our customers and partners in the intelligence sector. We're very proud to welcome Don to our executive team."

About Modus Operandi

Modus Operandi accelerates customer mission success by modernizing software systems and liberating information. Since 1984, the company has been on the forefront of information integration technology advancement. As a result of continuous innovation and multi-million dollar investment, our solutions are now at work in many mission critical operations.
