## NEWS RELEASE

### **Modus Operandi Awarded U.S. Army Contract for Predictive Intelligence Capabilities**

*Persistent Vigilance creates intelligent semantic agents to help predict instantly recognizable situational awareness for Army analysts.*

**MELBOURNE, FL, Sept. 30, 2008** – Modus Operandi, a leading software and information integration technology company, has been awarded a \$70,000 contract by the U.S. Army Communications-Electronics Command (CECOM) to establish a predictive intelligence capability. The contract is sponsored by the U.S. Army Research, Development and Engineering Command (RDECOM) at Ft. Monmouth, N.J. through the Small Business Innovation Research (SBIR) program. The contract, entitled Persistent Vigilance, will support the Army's next generation Intelligence, Surveillance and Reconnaissance systems such as the Distributed Common Ground System-Army (DCGS-A).

Under the Persistent Vigilance contract, Modus Operandi will research and develop new technology to automate the production of actionable intelligence. The research will investigate the application of semantic technology that can reason over intelligence information from multiple sources. The resulting instantly generated, context-sensitive intelligence will speed the discovery, fusion, and understanding of information by analysts, and lead to better informed decision making.

"Modus Operandi will leverage existing technology and perform important research on increasing the velocity of intelligence cycles. The key element is agent-based semantic reasoning over flattened networks," said Richard Hull, chief scientist, Modus Operandi. "The DCGS-A warfighter will have access to an unprecedented volume of intelligence data, therefore the need for automated analysis is critical on the battlefield."

#### **About the U.S. Army CECOM & RDECOM**

The U.S. Army CECOM's mission is to sustain and support superior Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems for the joint warfighter--sustaining base, tactical, and strategic battlespace systems.

The U.S. Army RDECOM is the Army's focal point for developing and accelerating innovative technology and sound engineering solutions that provide our U.S. forces with decisive and dominant capability where they need it, when they need it. RDECOM is unparalleled in its depth and breadth of technical capability, innovation, and dedication to provide our U.S. forces with the best technology, today and in the future.

## **About Modus Operandi**

Modus Operandi is a software technology company focused on accelerating information discovery, fusion, integration and understanding. Since 1984, the company has been on the forefront of information technology advancement. As a result of continuous innovation and multi-million dollar investment, our solutions are now at work in many mission critical operations.

Additional information on Modus Operandi solutions is available from Modus Operandi, Inc., 122 Fourth Avenue, Indialantic, FL 32903. Phone: (321) 984-3370. Fax: (321) 728-3957. E-mail: [inquiries@modusoperandi.com](mailto:inquiries@modusoperandi.com). Website: <http://www.modusoperandi.com>. The company maintains offices in Ft. Monmouth, NJ; Tampa and Melbourne, Florida.
