PRESS RELEASE

Modus Operandi Revs Up Wave® Platform with Version 2.3 Support for OWL, XQuery and Search

Blend of Innovation and Expanded Support for Industry Standards Offers Customers Accelerated Deployment and More Extensible Integrated Enterprise Data Services

MELBOURNE, Florida, January 3, 2006 – Modus Operandi, a leading software and information integration technology company, announces the release of Version 2.3 of its powerful Wave® Platform for model-driven enterprise data services. The Wave Platform provides tools to semantically integrate information across the enterprise and then delivers unified and consistent access to that information. The Wave Platform is built upon the BEA AquaLogic Data Services Platform™.

To help simplify and speed deployment of integrated data, the Wave Platform now provides automated transformation of a conceptual model to a deployable logical model of enterprise data services using the industry standard Web Ontology Language (OWL). Once the model is deployed, the new Wave Search enables all enterprise data to be fully searchable upon integration without additional coding. Rounding out the new release, the new unified web services XQuery Application Programming Interface (API) feature enforces a consistent interface contract for all data services, improving reuse and adaptability.

Says Modus Operandi President and CEO, Peter Dyson, "The release of Wave 2.3 represents a significant step in our quest to give our customers the technology they need to achieve information superiority. By embracing industry standards and delivering out-of-the box search capability, the Wave Platform provides an open integration framework that delivers fast time-to-value."

About Modus Operandi

Modus Operandi provides products and services to connect people with enterprise information. Since 1984, the company has been on the forefront of information integration technology advancement. Today, Modus Operandi provides semantic integration technology and services to address complex information integration challenges.

Additional information on Modus Operandi solutions is available from Modus Operandi, Inc., 122 Fourth Avenue, Indialantic, FL 32903. Phone: (321) 984-3370. Fax: (321) 728-3957.
