Modus Operandi Joins Lockheed Martin Team For Army Battle Command Modernization Contract

Procurement Program will upgrade Army Battle Command Systems into net-centric, service-oriented architecture that enables full interoperability

MELBOURNE, FL, June 16, 2009 – Modus Operandi, a leading software and information integration technology company, announced today that it has joined the Lockheed Martin team for a U.S. Army contract vehicle that is designed to support the Army with the latest next-generation command-and-control technologies and services.

Lockheed Martin is one of six prime contractors selected to compete for numerous task orders in the program, which covers five years and has a maximum potential value of \$777 million. Modus Operandi will provide the Lockheed Martin team with software engineering and technical services to enable interoperability and cross-domain collaboration.

The Battle Command Family of Products indefinite-delivery-indefinite-quantity (IDIQ) contract vehicle, managed by Project Manager Battle Command in Fort Monmouth, NJ, will be used by the Army to obtain command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR) services, products and solutions.

“We are excited to be on Lockheed Martin’s team, which has provided the Army with state-of-the-art net-centric command and control solutions for more than 10 years,” said Peter Dyson, president and chief executive officer, Modus Operandi. “The opportunity to bring our technology and engineering capabilities to the warfighter via this contract vehicle is a tremendous accomplishment for Modus Operandi.”

About Modus Operandi

Modus Operandi is a software technology company focused on accelerating information discovery, integration and fusion for customers in the defense and intelligence community. Since 1984, the company has been on the forefront of information technology advancement. As a result of continuous innovation and multi-million dollar investment, our solutions are now at work in many mission critical operations.
