PRESS RELEASE

Modus Operandi Wins Two Air Force Contracts Supporting 45th Space Wing Knowledge Management Framework

- *Decision Explanation Engine Platform (DEEP) contract employs an innovative approach to explain decision histories to end users.*
- *Community Ontology Refinement with Adaptive Learning (CORAL) contract leverages usage patterns to better meet information needs.*

MELBOURNE, Florida, June 26, 2006 – **Modus Operandi**, a leading software and information integration technology company, has been awarded two Phase I Small Business Innovation Research contracts by the Air Force Research Laboratory (AFRL). The contracts, valued at \$100,000 each, will be performed in support of the U.S. Air Force's (USAF) 45th Space Wing and will further extend **Modus Operandi's** current **Wave**® architecture for semantic data integration. Both contracts will enrich the Knowledge Management Framework activities at the 45th Space Wing as well as corporate Wave development objectives.

The first contract, entitled "**Decision Explanation Engine Platform (DEEP)**" will create an ontology, or unifying information model, to fuse operational data and documents related to decision making. **DEEP** will provide the critical advances required to explain the decision process to end users in an easy-to-understand format.

The second contract, entitled "**Community Ontology Refinement with Adaptive Learning (CORAL)**" leverages usage patterns of an ontology to make it easier and faster for users to find the information they need. **CORAL** will help the ontology evolve with new and changing applications.

About Modus Operandi

Modus Operandi provides products and services to connect people with enterprise information. Since 1984, the company has been on the forefront of information integration technology advancement. Today, Modus Operandi provides semantic integration technology and services to address complex information integration challenges.
