NEWS RELEASE

Modus Operandi Awarded \$425,000 Project to Provide the U.S. Air Force with Expanded Intelligence Analysis Capabilities

Project will enable intelligence analysts to efficiently process significantly larger amounts of raw data

MELBOURNE, FL, March 10, 2010 – Modus Operandi, a leading software and information integration technology company, has been awarded a \$425,000 project by the Air Force Research Laboratory to provide expanded intelligence processing and analysis capabilities used by U.S. Air Force organizations. These capabilities can significantly improve intelligence analysis provided by an existing application called WebTHREADS, an acronym for Web-based Threat HUMINT (HUMAN INTelligence) Reporting Evaluation Analysis and Display System.

The "Decision Explanation Engine Platform (DEEP)" Phase II project, conducted as an enhancement, will extend Modus Operandi's Wave® Exploitation Framework capabilities to improve WebTHREADS' filtering, parsing, and persisting of large amounts of intelligence data.

The original DEEP phase II SBIR developed technologies that retrieve relevant information for decision support applications at the U.S. 45th Space Wing. In this enhancement to the DEEP Phase II contract, Modus Operandi will leverage the capabilities already developed in Phase II to build and deploy a set of applications that provide the required intelligence, surveillance and reconnaissance capabilities across much larger amounts of data.

"This expansion in analysis capabilities will not only enable users to find a needle in a raw intelligence haystack, but also to identify which needle is the one that needs to be acted upon," said George Eanes, vice president, business development, Modus Operandi. "These capabilities will serve to significantly increase analysts' abilities to respond quickly and accurately to data analysis requests thereby providing superior situational awareness reports to decision makers."

About Modus Operandi

Modus Operandi is a software technology company focused on accelerating information discovery, integration and fusion for customers in the defense and intelligence community. Since 1984, the company has been on the forefront of information technology advancement. As a result of continuous innovation and multi-million dollar investment, our solutions are now at work in many mission critical operations.

Additional information on Modus Operandi solutions is available from Modus Operandi, Inc., 709 S. Harbor City Blvd., Suite 400, Melbourne, FL 32901. Phone: (321) 473-1400. Fax: (321) 473-1499.
