PRESS RELEASE

Modus Operandi, Inc. Wins Navy Contract to Develop High-Level Coordination Solution for Battlespace Environment

MELBOURNE, Florida, July 15, 1998 – Modus Operandi has been awarded a contract by the Office of Naval Research (ONR), Arlington, Virginia, to develop a *Virtual Interactive Scenario Generation and Execution Environment (VISGEEN)*. Modus Operandi will apply state-of-the-art software technologies to provide a high-level coordination capability for creating and managing complex, synthetic battlespace environments. The resultant product will provide an increased level of interoperability and reusability of the models and simulations currently being used in the battlespace domain.

“The need to reduce software development costs by reusing existing models and simulations has universal applicability to both the government and commercial sectors,” states program manager Bruce McQueary. “Tools such as VISGEEN, that provide comprehensive support for creating meaningful simulations, will be widely marketable. VISGEEN’s complete support of the simulated environment, and its underlying open integration framework, make it uniquely attractive to the commercial modeling and simulation community.”

For this contract, Modus Operandi will develop VISGEEN and integrate it with existing Modeling and Simulation assets. These integrated assets will be used within VISGEEN to create a scenario, and then initialize, manage, and visualize it executing within the context of the DoD standard High-Level Architecture (HLA). This prototype will provide a solid foundation for a future full-scale VISGEEN implementation.

Upon successful completion, this effort is expected to lead to follow-on development contracts, and eventually to have a significant, worthwhile impact on our national security, through application to military training and systems development. VISGEEN is also directly applicable to commercial applications, such as medical simulation and entertainment-based simulation.

Additional information about the VISGEEN effort is available from Bruce McQueary, Modus Operandi, Inc., 122 Fourth Ave., Indialantic, FL 32951. Telephone: (321) 984-3370. Fax: (321) 728-3957.

About Modus Operandi

Modus Operandi is a leading Enterprise Integration Solutions company. From the creation of business and IT architectures designed to meet its clients' specific needs to the

development of their enterprise information portals, Modus Operandi delivers complete e-Business solutions that make business sense.

The company's proven, standards-based approach provides scalable, robust and secure enterprise integration solutions that keep pace with its clients' growth. Modus Operandi helps clients accelerate the deployment of their strategic business and technology solutions, including the integration of existing processes and systems with new Web-enabled capabilities.

As a result, Modus Operandi's Enterprise Integration Solutions produce a tailored business and technology infrastructure which integrates and aligns its clients' business operations and their Information Technology to achieve benefits such as:

- Agility in the development of new, streamlined and automated business processes
- Ready access to integrated business knowledge through Enterprise Information Portals
- Improved speed, accuracy and efficiency in business decision-making processes
- A robust, scalable and secure multi-tier enterprise architecture

Additional information on the company's expertise in providing leading-edge e-Business solutions is available from Modus Operandi, Inc., 122 Fourth Avenue, Indialantic, FL 32903. Phone: 321-984-3370. Fax: 321-728-3957. E-mail: info@modusoperandi.com. Website: www.modusoperandi.com. The company maintains offices in Atlanta, West Palm Beach and Melbourne, Florida.
